CS23336/GE23231/GE23233-IPP/PUP/PSPP

Status	Finished
Started	Monday, 19 October 2026, 9:09 AM
Completed	Monday, 19 October 2026, 9:16 AM
Duration	6 mins 24 secs
Grade	**13.00** out of 15.00 (**86.67**%)

Question **1**
Correct
Mark 1.00 out of 1.00
Flag question

What is the best-case time complexity of linear search?

● a. O(1) ✓
○ b. O(log n)
○ c. O👎
○ d. O(n log n)

Question **2**
Correct
Mark 1.00 out of 1.00
Flag question

What type of search would be most appropriate for finding an element in a list that is frequently updated?

○ a. Hash search
○ b. Binary search
○ c. Interpolation search
● d. Linear search ✓

Question **3**
Correct
Mark 1.00 out of 1.00
Flag question

In which situation is linear search more efficient than binary search?

○ a. When the list is small and sorted
○ b. When the list is large and unsorted
○ c. When the list is large and sorted
● d. When the list is small and unsorted ✓

Question **4**
Incorrect
Mark 0.00 out of 1.00
Flag question

What happens in a binary search if the list has an even number of elements?

○ a. The middle element is chosen randomly
○ b. The higher middle element is chosen as the middle element
● c. The lower middle element is chosen as the middle element ✗
○ d. The search stops

Question **5**
Correct
Mark 1.00 out of 1.00
Flag question

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

● a. 90 and 99 ✓
○ b. 89 and 99
○ c. 89 and 94
○ d. 90 and 94

Question **6**
Incorrect
Mark 0.00 out of 1.00
Flag question

Which of the following is not the required condition for a binary search algorithm?

○ a. The list must be sorted
○ b. There should be direct access to the middle element in any sublist
○ c. There must be a mechanism to delete and/or insert elements in the list
● d. Number values should only be present ✗

Number values should only be present

Question **7**
Correct
Mark 1.00 out of 1.00
Flag question

In which type of search is the list divided into smaller sublists during the search process?

○ a. Sequential search
○ b. Hash search
● c. Binary search ✓
○ d. Linear search

Question **8**
Correct
Mark 1.00 out of 1.00
Flag question

In the context of searching, what is a successful search?

● a. When the element is found in the list ✓
○ b. When the search algorithm finishes
○ c. When the list contains duplicate elements
○ d. When the list is sorted

Question **9**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is a type of searching method?

● a. Linear search ✓
○ b. Merge search
○ c. Bubble search
○ d. Quick search

Question **10**
Correct
Mark 1.00 out of 1.00
Flag question

What happens when the element is found in linear search?

○ a. The search starts over from the beginning
● b. The search stops immediately ✓
○ c. The search continues until the end of the list
○ d. The search backtracks to find duplicate elements

Question **11**
Correct
Mark 1.00 out of 1.00
Flag question

__________ search takes a sorted/ordered list and divides it in the middle.

○ a. Hash
○ b. Linear
○ c. Both (1) & (3)
● d. Binary ✓

Question **12**
Correct
Mark 1.00 out of 1.00
Flag question

What is the key characteristic of binary search?

○ a. It compares elements sequentially
○ b. It works on unsorted lists
● c. It can be applied only if the list is sorted ✓
○ d. It always starts from the beginning of the list

Question **13**
Correct
Mark 1.00 out of 1.00
Flag question

Which of the following is a conventional searching technique?

○ a. Dynamic search
○ b. Hashing
● c. Linear search ✓
○ d. Binary search

Question **14**
Correct
Mark 1.00 out of 1.00
Flag question

What is the first step in binary search?

○ a. Compare the target element with the first element in the list
○ b. Sort the list
○ c. Divide the list into two equal parts
● d. Compare the target element with the middle element in the list ✓

Question **15**
Correct
Mark 1.00 out of 1.00
Flag question

What is the time complexity of linear search in the worst case?

○ a. O(log n)
● b. O👎 ✓
○ c. O(n log n)
○ d. O(1)
