Status	Finished
Started	Sunday, 18 October 2026, 7:51 PM
Completed	Sunday, 18 October 2026, 7:56 PM
Duration	5 mins 29 secs
Grade	**15.00** out of 15.00 (**100**%)

Question **1**
Complete
Mark 1.00 out of 1.00
Flag question

What is one advantage of sorting a list before performing a search operation?

○ a. It makes the search operation slower
○ b. It has no effect on the search operation
○ c. It increases the number of comparisons needed
● d. It allows for faster searching

The correct answer is: It allows for faster searching

Question **2**
Complete
Mark 1.00 out of 1.00
Flag question

Which Python function would you use to sort a list in-place?

○ a. order()
● b. sort()
○ c. sorted()
○ d. arrange()

The correct answer is: sort()

Question **3**
Complete
Mark 1.00 out of 1.00
Flag question

What is Bubble Sort known for?

● a. Bubbling up the largest element to its correct position with each pass
○ b. Sorting data in a non-sequential manner
○ c. Using the divide-and-conquer approach
○ d. Being the most efficient sorting algorithm

The correct answer is: Bubbling up the largest element to its correct position with each pass

Question **4**
Complete
Mark 1.00 out of 1.00
Flag question

Which of the following best describes the process of Merge Sort?

○ a. It compares adjacent elements and swaps them if necessary
● b. It divides the list into two halves, sorts each half, and then merges them
○ c. It builds a sorted array one element at a time
○ d. It repeatedly finds the minimum element and moves it to the sorted part of the list

The correct answer is: It divides the list into two halves, sorts each half, and then merges them

Question **5**
Complete
Mark 1.00 out of 1.00
Flag question

What is the primary advantage of the divide-and-conquer approach in sorting algorithms?

● a. It allows for efficient parallel processing and sorting of data
○ b. It only works on small datasets
○ c. It simplifies the sorting process by using only one pass
○ d. It avoids the need for recursion

The correct answer is: It allows for efficient parallel processing and sorting of data

Question **6**
Complete
Mark 1.00 out of 1.00
Flag question

What is a significant characteristic of Bubble Sort?

● a. It bubbles up the largest element in each pass
○ b. It recursively sorts subproblems
○ c. It uses the heap data structure
○ d. It divides the list into sublists

The correct answer is: It bubbles up the largest element in each pass

Question **7**
Complete
Mark 1.00 out of 1.00
Flag question

Which sorting algorithm would be preferred for its divide-and-conquer approach?

○ a. Binary Search
● b. Merge Sort
○ c. Linear Search
○ d. Bubble Sort

The correct answer is: Merge Sort

Question **8**
Complete
Mark 1.00 out of 1.00
Flag question

What is mean by stable sorting algorithm?

○ a. A sorting algorithm is stable if it doesn't preserver the order of duplicate keys
● b. A sorting algorithm is stable if it preserves the order of duplicate keys
○ c. A sorting algorithm is stable if it preserves the order of all keys
○ d. A sorting algorithm is stable if it preserves the order of non-duplicate keys

The correct answer is:
A sorting algorithm is stable if it preserves the order of duplicate keys

Question **9**
Complete
Mark 1.00 out of 1.00
Flag question

Two-way merge sort algorithm is used to sort the following elements in ascending order.
200,470,150,80,90,40,400,300,120,70
What is the order of these elements after second pass of the merge sort algorithm?

○ a. 40,80,90,150,200,300,400,470,70,120
○ b. 40,70,80,90,120,150,200,300,400,470
● c. 80,150,200,470,40,90,300,400,70,120
○ d. 200,470,80,150,40,90,300,400,70,120

The correct answer is:
80,150,200,470,40,90,300,400,70,120

Question **10**
Complete
Mark 1.00 out of 1.00
Flag question

How does Merge Sort achieve its efficiency?

● a. By breaking the input into smaller parts and merging them
○ b. By comparing elements sequentially
○ c. By sorting data in a single pass
○ d. By using the bubble-up method

The correct answer is: By breaking the input into smaller parts and merging them

Question **11**
Complete
Mark 1.00 out of 1.00
Flag question

Which algorithm is efficient for analyzing the frequency distribution of items in a list?

○ a. Linear Search
○ b. Bubble Sort
○ c. Quick Sort
● d. Merge Sort

The correct answer is: Merge Sort

Question **12**
Complete
Mark 1.00 out of 1.00
Flag question

In Merge Sort, what happens after dividing the input into smaller parts?

● a. Each part is sorted independently
○ b. Each part is searched for a specific element
○ c. The parts are ignored
○ d. The parts are merged without sorting

The correct answer is: Each part is sorted independently

Question **13**
Complete
Mark 1.00 out of 1.00
Flag question

__________ explain how an algorithm will perform when the input grows larger.

○ a. Merging
○ b. Searching
○ c. Sorting
● d. Complexity

The correct answer is:
Complexity

Question **14**
Complete
Mark 1.00 out of 1.00
Flag question

What type of problems can sorting help solve efficiently?

○ a. Duplicates
○ b. Selection
● c. All of the above
○ d. Searching

The correct answer is: All of the above

Question **15**
Complete
Mark 1.00 out of 1.00
Flag question

Algorithm design technique used in merge sort algorithm is

○ a. Backtracking
● b. Divide and conquer
○ c. Dynamic programming
○ d. Greedy method

The correct answer is:
Divide and conquer
